The Speaker being greeted by our member Malini

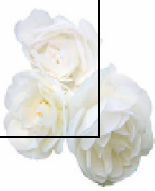

The speaker V.Sriram addressing the audience at The Aura on Carnatic Tales from Trichy

What went behind....

“Greece and Egypt have all disappeared; But our name and distinction have remained intact.-There is something on account of which our entity or identity does not disappear; Although time has remained hostile to us for centuries.”

Such is the greatness of India- our Bharath Mahan! Mr. Sriram, in his talk on the carnatic tales of Trichy opened up many a Pandora’s box and brought to light the various phases in the growth of music in this ancient town while revealing famous faces that lit up the music scene from time immemorial to this day. His narration was not at all like a history lecture but more like a fairy tale and like little children we were all sitting at the chair’s edge, eyes wide open, mouths agape and devouring all the fascinating facts that he delivered with ease and élan. His PPT presentation was replete with pictures of musicians, famous during a particular period of time but little known to the present generation, with special krithis that belonged to that epoch and special events that are continued to be celebrated even today, like the Thiagarajah Aradhana. Little known details were unfurled and all those present left with a deep sense of satisfaction at having gathered information that could be shared with our families.
