June 2017

What went behind.....

Noted film and stage actor T M Karthik, our guest in April was a true entertainer. His experience in training, love for theatre and great sense of humor made the event a memorable one. The special prayer set the tempo, for a day filled with fun, laughter and action! The importance of group dynamics was well presented with various activities. During the second half, our members grabbed the opportunity to showcase their acting talents. Creation of short plays with constraints such as use of multiple languages, freeze frames, using characters as props, etc brought out our creative skills. Enthusiastic participation by the members and the speaker made it a memorable event.

What Lies Ahead.....

For years children have enjoyed their vacations making paper boats, rockets, flowers, etc. Origami is a Japanese art of folding paper. An activity we enjoyed as kids, is a highly researched topic today. Engineers use origami principles to make solar panels, which are designed to open after the launch of a spacecraft. Micro instruments which unfold inside the body to perform delicate surgeries is also one such example. A popular face on television and newspapers, our guest K.Arunabalan, has made the Japanese art of Origami popular in the city. He has conducted numerous workshops in schools and engineering colleges around Trichy. Come, let's try our hand at this wonderful art and add another feather in our cap.

The Aura NEWSLETTER

Creativity is
Inventing,
Experimenting,
Growing,
Taking risks,
Breaking rules,
Making mistakes
And having fun !
- Mary Lou Cook.

*'The greatest threat to our
planet is the belief that someone
else will save it'.*

June 5th

World Environment Day.
